A photograph of a modular synthesizer rack. The rack is filled with various modules, including oscillators, filters, and mixers. A dense network of colorful patch cables (red, yellow, blue, green, white) connects the modules, creating a complex web of connections. The cables are bundled and organized, showing a systematic approach to patching. The rack itself is a metal frame with multiple slots for the modules. The overall scene is a detailed view of a custom-built electronic music instrument.

Modulare Synthesizer

A-100 Doepfer

Analog Modular Sytem

Basic Patch:

VCO

(Voltage Controlled Oscillator)

VCA

(Voltage Controlled Amplifier)

Mixer
